Paphos, Cyprus

AAMAS'26

Proceedings of the 25th International Conference on
Autonomous Agents and Multiagent Systems

General Chairs:

Viviana Mascardi (University of Genova, Italy)
John Thangarajah (RMIT University, Australia)

Program Chairs:

Chris Amato (Northeastern University, USA)
Louise Dennis (University of Manchester, UK)

Publication Chairs:

Rafael C. Cardoso (University of Aberdeen, UK)
Mengwei Xu (Newcastle University, UK)

Welcome Message from the Chairs

Welcome to AAMAS-2026, the 25th edition of the International Conference on Autonomous Agents and Multiagent Systems!

AAMAS is the largest and most influential conference in the area of agents and multiagent systems, bringing together researchers and practitioners in all areas of agent technology and providing an internationally renowned high-profile forum for publishing and learning about the latest developments in the field. AAMAS is the flagship conference of the non-profit International Foundation for Autonomous Agents and Multiagent Systems (IFAAMAS).

Twenty-five years ago, AAMAS was established through the merger of three highly respected conferences — AGENTS (International Conference on Autonomous Agents), ICMAS (International Conference on Multi-Agent Systems), and ATAL (International Workshop on Agent Theories, Architectures, and Languages) — bringing together the autonomous agents and multiagent systems research community under a single, high-profile international forum. The aim was to unite and advance research in the theory and practice of autonomous agents: software capable of acting on behalf of humans, perceiving their environments, making decisions, and collaborating within complex multiagent societies. As we mark the 25th anniversary milestone, with this 2026 edition, the world around us has caught up with - and in many ways validated - the importance of agents. The remarkable emergence of generative AI and Large Language Models has brought the concept of autonomous agents to the forefront of the global technology landscape, with “Agentic AI” now a much talked about term. In recognition of this, we have introduced a dedicated new topic area this year - Generative and Agentic AI (GAAI).

We are happy that the 2026 edition of AAMAS will be hosted in Paphos, Cyprus. Previous editions were held in Bologna (2002), Melbourne (2003), New York (2004), Utrecht (2005), Hakodate (2006), Honolulu (2007), Estoril (2008), Budapest (2009), Toronto (2010), Taipei (2011), Valencia (2012), Saint Paul (2013), Paris (2014), Istanbul (2015), Singapore (2016), São Paulo (2017), Stockholm (2018), Montréal (2019), Auckland/online (2020), London/online (2021), Auckland/online (2022), London (2023), Auckland (2024), and Detroit (2025).

The main track of the conference includes peer-reviewed technical papers describing significant and original research on all aspects of the theory and practice of autonomous agents and multiagent systems, divided into the following areas of interest:

- Learning and Adaptation (LEARN)
- Generative and Agentic AI (GAAI)
- Game Theory and Economic Paradigms (GTEP)
- Coordination, Organizations, Institutions, Norms, and Ethics (COINE)
- Search, Optimization, Planning, and Scheduling (SOPS)
- Representation and Reasoning (RR)
- Engineering and Analysis of Multiagent Systems (EMAS)
- Modeling and Simulation of Societies (SIM)
- Human-Agent Interaction (HAI)
- Robotics and Control (ROBOT)
- Innovative Applications (IA)

As in previous years, we worked with a three-tier program committee, consisting of 46 area chairs, 113 senior program committee members, and over 800 regular program committee members. Their work was supported by a substantial number of auxiliary reviewers. When composing the committee, we followed the tradition of AAMAS of not having anyone serve in a senior programme committee or area chair role for more than two years in a row, and we were pleased to see that many senior colleagues accepted our invitation to serve as regular programme committee members.

For the main track, we received a total of 1842 abstract submissions. Some didn’t materialize while a number of others were desk-rejected (mostly due to anonymity violations and similar infringements of the rules laid down in the Call for Papers). The program committee then reviewed the remaining 1359 submissions. Almost all submissions received at least three reviews, as well as a meta-review summarizing the assessment of the program committee. Authors had the opportunity to respond to initial versions of their reviews during a rebuttal phase.

The program committee accepted 338 submissions as full papers and a further 193 as extended abstracts, resulting in an acceptance rate of 25.5% for full papers and an overall acceptance rate of around 40%. Most of these contributions are included in this volume of proceedings (excluding papers that were later withdrawn by their authors). The submission numbers (N), acceptance rates for full papers (FP), and overall acceptance rates (FP+EA) per area of interest are as follows:¹

	N	FP	FP+EA
LEARN	385	18%	28%
GAAI	191	18%	31%
GTEP	285	24%	38%
COINE	53	25%	38%
SOPS	158	28%	41%
RR	97	29%	43%
EMAS	110	22%	34%
SIM	77	26%	36%
HAI	59	14%	27%
ROBOT	74	20%	35%
IA	52	27%	38%

In addition to the main track, the conference has four special tracks—the Blue Sky Ideas track, the JAAMAS track, AAAI track, and the Demonstration track, as well as a Doctoral Consortium.

The focus of the Blue Sky Ideas track, which this year is chaired by Ann Nowé and Michael Winikoff, is on visionary ideas, long-term challenges, new research opportunities, and controversial debate.

The JAAMAS track, chaired by Kate Larson and Toshiharu Sugawara, offers authors of papers recently published in the Journal of Autonomous Agents and Multiagent Systems (JAAMAS) that have not previously appeared as full papers in an archival conference the opportunity to present their work at AAMAS.

The AAAI track provided authors of high quality papers related to AAMAS topics, that didn’t make it into the AAAI 2025 conference,

¹These are approximate, as at the time of this analysis a number of papers had already been withdrawn by the authors during or after the review cycle.

a fast track for reviewing at AAMAS. This track was chaired by Bo An.

The Demonstrations and Competitions track, chaired by Fei Fang and Nardine Osman, allows participants from both academia and industry to showcase their latest developments in agent-based and robotic systems.

Finally, the Doctoral Consortium, chaired by Reyhan Aydoğan and Pradeep Murukannaiah, provides doctoral candidates with an opportunity to receive feedback on their research, to interact closely with senior figures in their own area of specialization, and to broaden their professional network.

The accepted contributions for all of these tracks are included in these proceedings as well: 17 accepted papers out of 129 submissions to the Blue Sky Ideas track; extended abstracts of 3 recent papers published in JAAMAS; 19 papers accepted out of 37 submissions in the AAAI track; 44 accepted summaries out of 67 submissions to the Demonstration track; and 34 accepted summaries to the Doctoral Consortium.

The first two days of the conference, 25-26 May, will consist of a variety of satellite workshops, tutorials, competitions, and the Doctoral Consortium.

The main conference runs from May 27. During this time the authors of contributions to the main track, the Blue Sky Ideas track, the JAAMAS track, the AAAI Track, and the Demonstration track will present their work. We furthermore are looking forward to a panel session celebrating 25 years of AAMAS as well as keynote addresses by Joanna Bryson, Sabine Hauert and Mike Wooldridge, and

the winner's of this year's recipient of the ACM/SIGAI Autonomous Agents Research Award, Sven Koenig, and the 2025 Victor Lesser Dissertation Award, Tonghan Wang.

The conference will also feature a social event, a series of informal discussion sessions organized around specific topics, and the annual IFAAMAS Community Meeting. Let us conclude these introductory words with a heartfelt expression of gratitude to all those who played a role in the success of this conference. We extend our thanks to all those who submitted their work for review, as well as those who will present their work at the conference. A special acknowledgment is owed to the dedicated members of the program committee, the additional reviewers, the organizers of the satellite workshops, and the tutorial presenters. We also want to express our appreciation to the organizing committee, for their efforts to bring AAMAS to Cyprus. Lastly, we extend our sincere thanks to all the sponsors of the conference for their contribution to the success of AAMAS.

We wish you a great conference and are looking forward to meeting everyone in Cyprus!

Chris Amato & Louise Dennis
AAMAS-2026 Program Chairs

Viviana Mascardi & John Thangarajah
AAMAS-2026 General Chairs

Conference Organization

General Chairs

Viviana Mascardi (*University of Genova, Italy*)
John Thangarajah (*RMIT University, Australia*)

Program Chairs

Chris Amato (*Northeastern University, USA*)
Louise Dennis (*University of Manchester, UK*)

Local Organizing Chair

George A. Papadopoulos (*University of Cyprus, Cyprus*)

Local Organizing Vice Chair

Panayiotis Kolios (*University of Cyprus, Cyprus*)

Local Organizing Committee

Yannis Dimopoulos (*University of Cyprus, Cyprus*)
Antonis Kakas (*University of Cyprus, Cyprus*)
Kleanthis Malialis (*KOIOS Research and Innovation Centre, University of Cyprus, Cyprus*)

Publication Chairs

Rafael C. Cardoso (*University of Aberdeen, UK*)
Mengwei Xu (*Newcastle University, UK*)

Silver Jubilee Chairs

Jaime Simão Sichman (*University of São Paulo, Brazil*)
Felipe Leno da Silva (*Microsoft, USA*)

Workshop Chairs

Débora Cristina Engemann (*Institute of Artificial Intelligence in Health, Brazil*)
Sebastian Rodriguez (*RMIT University, Australia*)

Tutorial Chairs

Noa Agmon (*Bar-Ilan University, Israel*)
Tony Bastin Roy Savarimuthu (*University of Otago, New Zealand*)

JAAMAS Track Chairs

Kate Larson (*University of Waterloo, Canada*)
Toshiharu Sugawara (*Waseda University, Japan*)

AAAI Track Chair

Bo An (*Nanyang Technological University, Singapore*)

Blue Sky Ideas Track Chairs

Ann Nowé (*Vrije Universiteit Brussel, Belgium*)
Michael Winikoff (*Victoria University of Wellington, New Zealand*)

Demonstration and Competition Chairs

Fei Fang (*Carnegie Mellon University, USA*)
Nardine Osman (*Artificial Intelligence Research Institute (IIIA-CSIC), Spain*)

Doctoral Consortium Chairs

Reyhan Aydoğan (*Özyeğin University, Turkey*)
Pradeep Murukannaiah (*Delft University of Technology, Netherlands*)

Scholarship Chairs

Roberta Calegari (*Università di Bologna, Italy*)
Hadi Hosseini (*Penn State University, USA*)

Publicity Chairs

George A. Papadopoulos (*University of Cyprus, Cyprus*)
Alexandru Sorici (*National University of Science and Technology Politehnica of Bucharest, Romania*)

Sponsorship Chairs

Panayiotis Kolios (*University of Cyprus, Cyprus*)
Reshef Meir (*Technion-Israel Institute of Technology, Israel*)

Safety and Inclusion Chairs

Zahra Ghorrati (*Purdue University, USA*)
Mor Vered (*Monash University, Australia*)

Area Chairs

Learning and Adaptation

Karthik Abinav Sankararaman (*Facebook*)
Bo An (*Nanyang Technological University*)
Vincent Corruble (*Sorbonne Université*)
Francisco Cruz Naranjo (*University of New South Wales*)
Ferdinando Fioretto (*University of Virginia*)
Sarah Keren (*Technion*)
Yasser Mohammad (*NEC Corporation and Assiut University*)
Kun Shao (*Huawei*)
Yali Du (*King's College London*)

Generative and Agentic AI

Prashant Doshi (*University of Georgia*)
Kate Larson (*University of Waterloo and Google DeepMind*)
Karl Tuyls (*Meta*)
Kagan Tumer (*Oregon State University*)

Game Theory and Economic Paradigms

Niclas Boehmer (*Hasso Plattner Institute*)
Noam Hazon (*Ariel University*)
Omer Lev (*Ben-Gurion University*)
Miming Li (*City University of Hong Kong*)
Shuai Li (*Shanghai Jiao Tong*)
Neeldhara Misra (*IIT Gandhinagar*)
Svetlana Obraztsova (*Carleton University*)
Maria Silvia Pini (*University of Padova*)
Alan Tsang (*Carleton University*)

Coordination, Organizations, Institutions, Norms, and Ethics

Nirav Ajmeri (*University of Bristol*)
Reyhan Aydogan (*Özyeğin University*)
Jaime Simão Sichman (*Universidade de São Paulo*)

Search, Optimization, Planning, and Scheduling

Roman Barták (*Charles University*)
Sara Bernardini (*University of Oxford*)
Filippo Bistaffa (*IIA-CSIC*)
Roni Stern (*Ben-Gurion University*)

Representation, Perception, and Reasoning

Roberta Calegari (*Università di Bologna*)
Brian Logan (*University of Aberdeen and Utrecht University*)
Vanina Martinez (*IIA-CSIC*)
Valentina Tamma (*University of Liverpool*)

Engineering and Analysis of Multiagent Systems

Leandro Buss Becker (*Universidade Federal de Santa Catarina*)
Angelo Ferrando (*Università degli Studi di Modena e Reggio Emilia*)
Zahia Guessoum (*Université de Reims Champagne Ardenne*)

Modeling and Simulation of (Artificial) Societies

Shah Jamal Alam (*Habib University*)
Franziska Klügl (*Örebro University*)
Fabian Lorig (*Malmö University*)

Human-Agent Interaction

Beatrice Biancardi (*CESI LINEACT*)
Brittany Duncan (*University of Nebraska-Lincoln*)
Matthias Scheutz (*Tufts University*)

Robotics and Control

Nicola Basilico (*Università degli Studi di Milano*)
Maria Gini (*University of Minnesota*)

Innovative Applications

Zehong (Jimmy) Cao (*University of South Australia*)
Gauthier Picard (*Onera*)

Awards

AUTONOMOUS AGENTS RESEARCH AWARD

The *ACM/SIGAI Autonomous Agents Research Award* is an annual award for excellence in research in the area of autonomous agents. The award is intended to recognize researchers in autonomous agents whose current work is an important influence on the field. It is an official ACM award, funded by an endowment created from the proceeds of the Autonomous Agents conferences.

Recipient: The selection committee for the ACM/SIGAI Autonomous Agents Research Award is pleased to announce that Professor Sven Koenig is the recipient of the 2026 award.

Citation: Sven Koenig is Chancellor's Professor and Bren Chair at the Computer Science Department of UC Irvine. He is one of the foundational figures of modern AI planning and search, whose work has fundamentally shaped how intelligent agents reason and act in complex, dynamic environments. His contributions seamlessly bridge theory and practice, with a profound impact not only on AI and multi-agent systems, but also on robotics, where his algorithms have enabled robust, scalable autonomy in real-world robotic platforms. A Fellow of AAAI, AAAS, and ACM, Professor Koenig has received several best paper awards from AAAI, ICAPS, and SoCS, and has contributed to the community in numerous service roles, most recently serving as the conference chair of AAAI 2026.

INFLUENTIAL PAPER AWARD

The *IFAAMAS Influential Paper Award* seeks to recognize publications that have made influential and long-lasting contributions to the field. Candidates for this award are papers that have proved a key result, led to the development of a new subfield, demonstrated a significant new application or system, or simply presented a new way of thinking about a topic that has proved influential.

This year's award committee selected two winners to be recognized with an IFAAMAS Influential Paper Award:

Book: Jeffrey S. Rosenschein and Gilad Zlotkin, *Rules of Encounter: Designing Conventions for Automated Negotiation Among Computers*, MIT Press, 1994.

Citation: The book helped define the field of multi-agent systems by introducing and promoting the application of game theory and mechanism design to create interaction protocols among agents. Before the work described in the book, much of the research in distributed AI assumed agents had a common goal and were fully collaborative. The book advocates a rigorous mathematical foundation for analyzing the interactions between self-interested agents. The book has 2439 citations.

Collection of 3 papers:

- (1) Amy Greenwald and Keith Hall, *Correlated-Q Learning*, ICML 2003.
- (2) Junling Hu and Michael Wellman, *Nash Q-Learning for General-Sum Stochastic Games*, Journal of Machine Learning Research 4 (2003) 1039-1069.

- (3) Amy Greenwald and Amir Jafari, *A General Class of No-Regret Learning Algorithms and Game-Theoretic Equilibria in Learning Theory and Kernel Machines*, Springer Nature, 2003.

Citation: The papers collectively address learning in games (Correlated-Q Learning, Nash Q-Learning, No-Regret Algorithms), which play an important role in the multi-agent area. This line of work, conducted by members of the multi-agent community, has been fundamental to developing the theoretical foundations of multi-agent reinforcement learning.

DISTINGUISHED DISSERTATION AWARD

The *Victor Lesser Distinguished Dissertation Award* is given for dissertations in the field of autonomous agents and multiagent systems that show originality, depth, impact, as well as quality of writing, supported by high-quality publications.

The recipient of the 2025 IFAAMAS Victor Lesser Distinguished Dissertation Award is Dr. Tonghan Wang, whose thesis entitled "Advancing Deep Learning for Multi-agent AI: Mechanisms, Organizations, and Dynamics" was supervised by Prof. David Parkes and Prof. Milind Tambe at Harvard University.

The selection committee also wishes to recognize Dr. Théo Delemazure whose thesis "Expressive Ballots for Voting Systems and Political Analysis" was supervised by Dr. Jérôme Lang and Dr. Dominik Peters at Université Paris Dauphine and Dr. Nicholas Teh whose thesis "Algorithmic Fairness in Sequential Decision-Making" was supervised by Prof. Edith Elkind and Prof. Paul Goldberg at the University of Oxford.

BEST PAPER AWARDS

Among the many excellent submissions received, the conference will honor papers in the main track with awards: the Best Paper Award (for which all papers are eligible), and the Pragnesh Jay Modi Best Student Paper Award (for papers with a principal author who is a student).

The Pragnesh Jay Modi Best Student Paper Award is generously supported by Springer.

The winners will be announced during the conference opening.

BLUE SKY IDEAS AWARD

The focus of the Blue Sky Ideas track is on visionary ideas, long-term challenges, new research opportunities, and controversial debate. It serves as an incubator for innovative, risky, and provocative ideas, and it aims at providing a forum for publishing and presenting such ideas without being constrained by the results-oriented standards followed in the main track of the conference.

At the conference, one of the papers submitted to this special track will receive the *Blue Sky Ideas Award*.

The Blue Sky Ideas track is generously supported by the Computing Community Consortium (CCC).

BEST DEMO AWARD

The *Best Demo Award* will be bestowed upon the authors of the most applicable and innovative contribution to the Demonstration track. The winner will be announced during the conference banquet.
